

Delinyah Koning

Biomedical analyst & Research Technician

Nationality: Dutch
Localisation: Lille, France
Contact:
koningdelinyah@gmail.com
+31 6 1383 9227

Biomedical researcher with hands-on experience in molecular biology, genetics, microbiology, and data-driven analysis. Skilled in both laboratory experimentation and computational workflows.

Education & Certificates

BSc Biology & Medical Laboratory Research

Hanze University, Groningen (2023)

Green thinker (II)

Green Ambassador Organization (2022)

Safe Microbial Techniques PG1/ FIN-1

Hanze University, Groningen (2020)

Skills

- Microbiology
- Biochemistry
- Cell biology
- Genetics
- PCR
- Western Blot
- ELISA
- CRISPR
- Microscopy & TEM
- Chromatography
- Spectrophotometry
- FACS
- Python, Bash, R
- Molecular Dynamics
- Statistical analysis
- Signal analysis
- Numerical analysis
- Text mining

Work experience

February 2023 - June 2025

Molecular Dynamics Research Group, University of Groningen, NL

Researcher Molecular Dynamics

Studying molecular dynamics of mitochondrial membrane proteins in their native lipid environment using large-scale MD simulations.

February 2024 - August 2024

TenWise BV., Research Center BioBased Economy, Groningen, NL

Data Analyst TenWise B.V.

Optimising large scale text mining algorithms, and precompiling filters for text analytics.

September 2022 - February 2023

Molecular Cell Biology Research Group, University of Groningen, NL

Research Intern Molecular Cell Biology

Studying peroxisomal biogenesis and organelle dynamics in Hansenula Polymorpha

September 2022 - February 2023

Lifelines Groningen, University of Groningen, Hanze UAS, NL

Research Analyst Lifelines Groningen

Developing machine learning and visualization algorithms to find health prediction models in high-dimensional biobank data.

May 2020 - July 2025

Hanze University of Applied Sciences, Groningen, NL

Vice-chair of the board of studies

Joint discussion of the implementation of education.
Right of advice and consent.

January 2022 - February 2023

Hanze University of Applied Sciences, Groningen, NL

Teaching Assistant Higher Laboratory Education

Provide practical and theoretical support in laboratory education.

Other work experience

February 2023 -
June 2025

Molecular Dynamics Research Group, University of Groningen, NL

Researcher Molecular Dynamics

Studying molecular dynamics of mitochondrial membrane proteins in their native lipid environment using large-scale MD simulations.

February 2024 -
August 2024

TenWise BV., Research Center BioBased Economy, Groningen, NL

Data Analyst TenWise B.V.

Optimising large scale text mining algorithms, and precompiling filters for text analytics.

September 2022 -
February 2023

Molecular Cell Biology Research Group, University of Groningen, NL

Research Intern Molecular Cell Biology

Studying peroxisomal biogenesis and organelle dynamics in *Hansenula Polymorpha*

September 2022 -
February 2023

Lifelines Groningen, University of Groningen, Hanze UAS, NL

Research Analyst Lifelines Groningen

Developing machine learning and visualization algorithms to find health prediction models in high-dimensional biobank data.

May 2020 -
July 2025

Hanze University of Applied Sciences, Groningen, NL

Vice-chair of the board of studies

Joint discussion of the implementation of education.
Right of advice and consent.

January 2022 -
February 2023

Hanze University of Applied Sciences, Groningen, NL

Teaching Assistant Higher Laboratory Education

Provide practical and theoretical support in laboratory education.
